LA COLLEZIONE | THE COLLECTION

La serie Roma comprende tavolini e servomuti. Questi ultimi sono accomunati da uno specifico particolare: la base tondeggiante che caratterizza le due collezioni: *Roma* e *Roma Antica*. Nel primo caso la base è costituita da un cilindro liscio e solido, mentre nel secondo la base rievoca il caratteristico fusto romano segnato da profonde scanalature in pietra. Si tratta di volumi scultorei ed accessori studiati per semplificare i piccoli gesti della quotidianità.

The Roma series comprises coffee tables and servants. The latter are united by a specific detail: the rounded base that characterises the two collections: Roma and Roma Antica. In the first case the base consists of a smooth, solid cylinder, while in the second the base evokes the characteristic Roman shaft marked by deep stone grooves. These are sculptural volumes and accessories designed to simplify the small gestures of everyday life.
